

# **GW Power-Safe Ltd Carbon Reduction Plan**

## **Publication Date**

The date of publication is 23rd June 2025.

## Commitment to achieving Net Zero

GW Power-Safe Ltd is committed to achieving Net Zero emissions by 2030.

### Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

<b>Baseline Year: July 2023-June 2024</b>	
<b>Additional Details relating to the Baseline Emissions calculations.</b>	
Half hourly meter which is read every month for electrical consumption in addition we have solar PV generation which is monitored weekly to ensure our carbon values are accurate.	
<b>Baseline year emissions: July 2023-June 2024</b>	
<b>EMISSIONS</b>	<b>TOTAL (tCO<sub>2</sub>e)</b>
<b>Scope 1</b>	57.8
<b>Scope 2</b>	3.18
<b>Scope 3</b>	2.4 (employee commuting)
<b>Scope 3</b>	0.6 (waste)
<b>Scope 3</b>	2.9 (business Travel)
<b>Scope 3</b>	0.0 (Upstream Distribution) These are currently not measured. We are actively liaising with our supply chain and manufacturers. This data is anticipated to be completed sometime in 2025.

<b>Scope 3</b>	0.0 (Downstream Distribution) These are currently not measured. We are actively liaising with our supply chain and manufacturers. This data is anticipated to be completed sometime in 2025.
<b>Total Emissions</b>	66.88

## Current Emissions Reporting

<b>Current Report Year: July 2024 – June 2025</b>	
<b>Additional Details relating to the Current Reporting Emissions calculations.</b>	
In addition to our half-hourly meter readings for electrical consumption and weekly monitoring of solar PV generation, we are progressing towards a net-zero office environment, scheduled for our move-in by October 2025. This strategic transition aims to significantly reduce our carbon footprint, aligning with our commitment to sustainability and accurate carbon reporting.	
<b>Current year emissions: July 2024 – June 2025</b>	
<b>EMISSIONS</b>	<b>TOTAL (tCO<sub>2</sub>e)</b>
<b>Scope 1</b>	57.8
<b>Scope 2</b>	0 Net Zero Office
<b>Scope 3</b>	2.4 (employee commuting)
<b>Scope 3</b>	0.6 (waste)
<b>Scope 3</b>	0 (Business Travel electric fleet)
<b>Scope 3</b>	0.0 (Upstream Distribution) These are currently not measured. We are actively liaising with our supply chain and manufacturers. This data is anticipated to be completed sometime in 2024.

<b>Scope 3</b>	0.0 (Downstream Distribution) These are currently not measured. We are actively liaising with our supply chain and manufacturers. This data is anticipated to be completed sometime in 2024.
<b>Total Emissions</b>	60.8

## Target Emissions Reporting

Target Year: 2030	
EMISSIONS	TOTAL (tCO <sub>2</sub> e)
<b>Scope 1</b>	30
<b>Scope 2</b>	0.2
<b>Scope 3</b>	1.0 tonnes (employee commuting)
<b>Scope 3</b>	0.4 (waste)
<b>Scope 3</b>	3.0 (business Travel)
<b>Scope 3</b>	0.0 (Upstream Distribution) These are currently not measured. We are actively liaising with our supply chain and manufacturers. This data is anticipated to be completed sometime in 2024.
<b>Scope 3</b>	0.0 (Downstream Distribution) These are currently not measured. We are actively liaising with our supply chain and manufacturers. This data is anticipated to be completed sometime in 2024.
<b>Total Emissions</b>	0 tonnes in operation (energy) consumption. 34.6 in business operation (construction activity)

## Emissions reduction targets

Our current electricity supply produces 977 kg CO<sub>2</sub>, 63% will be supplied by solar, saving 618 kg CO<sub>2</sub> each year. 8,457 KWh will be exported, saving 1,796 kg CO<sub>2</sub> each year. TOTAL SAVINGS 2,414 kg CO<sub>2</sub> each year.

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 34.6 tCO<sub>2</sub>e by 2030. This is a reduction of 48.6%

Progress against these targets can be seen in the graph below:

Carbon Reduction: Projected vs. Actual

## Carbon Reduction Projects

### Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2021/2022 baseline. The carbon emission reduction achieved by these schemes equate to 2,414 tCO<sub>2</sub>e, a 4.92%ge reduction against the 2021/2022 baseline and the measures will be in effect when performing the contract.

We have LED/PIR lighting controls in the current offices, we are offsetting our fuel emissions by planting trees, we have added solar PV to our offices. We have put practices in place in the workplace to reduce waste.

We have electrified most of our fleet vans.

In the future we hope to implement further measures such as:

We are moving into a retrofit net zero office in October 2025.

### Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

.....Daniel Haley.....(Managing Director).....
